other: 13%

process water
usage daily

**13 million
gallons**

electric power
usage monthly

**143.8 million
Kilowatt Hrs.**

facility overview:

Since beginning operation in 1963, the refinery has grown to be the corporation's largest U.S. refinery and one of the top petroleum refineries in the United States.

The refinery's success is built upon our business and community partnerships with the people of Jackson County, as well as our production of quality products in ways that are compatible with the community and the environment.

At the heart of the Pascagoula Refinery's success are our employees and their commitment to The Chevron Way. Employees share Chevron's vision to be the global energy company most admired for its people, partnership and performance.

The Pascagoula Refinery is located east of the City of Pascagoula in an unincorporated area of Jackson County. Our facilities are situated in the Bayou Casotte Industrial Park on over 3,000 acres adjacent to the Mississippi Sound. Since only a portion of our property is developed, about two-thirds of the acreage is wetlands and forestlands that are home to many species of wildlife indigenous to the Gulf Coast.

2015/2016 refinery awards

"Excellence in Exporting" award

Export Champion award Mississippi
Development Authority & Mississippi District
Export Council

Meritorious Safety Performance

2014 Total Recordable Injury Rate <0.6
