

Drive South on Hwy 63, cross the bridge that spans Hwy 90. Highway 63 becomes Hwy 611/Industrial Road. Continue south and pass through two traffic lights.

After passing through the 2nd traffic light you will see a group of Chevron mobile building offices (a.k.a. PNC) on your left. Continue past them.

You will then see the Refinery on your left (east side of road). There are chemical plants on the right side.

You will pass the large storage tanks, pass over a small bridge with pipes beneath, and pass the entrance for tanker trucks. You should then look for the main entrance, which has a lighted Chevron sign (pictured below). You should turn just in front of the sign (following the arrow for Visitors).

Approach the security building and give them your name. Security will direct you to the Main Lobby, who will then contact your host to let them know you are on site. Your host will meet you in the lobby to escort you to your destination.
