advancing a lower carbon future

We are committed to leading in the future of energy, enhancing transparency and lowering carbon intensity cost efficiently.

Chevron's commitment to sustainability has never been stronger. Our approach is integrated throughout our business to strive to protect the environment, empower people, and get results the right way—today and tomorrow.

We believe the future of energy will be lower carbon, and we intend to be a leader in that today and in the future.

your pascagoula refinery

- Connects the world by supplying jet fuel to 20+ international airports in the U.S.
- Supplies 100+ local gas stations
- Makes air travel possible by fueling about 100 smaller airports in the southeast
- Makes up more than 90% of the refining capacity in MS
- Supplies transportation fuels to El Salvador, Guatemala, Honduras & Panama

we're proud of our industry

- The oil and gas industry has a unique ability to meet the world's growing needs
- Refinery operations enable us to develop products we use on a daily basis, in addition to providing for our energy needs, manufacturing and much more
- The oil and gas industry supports productivity in everything from agriculture to healthcare

we develop the energy that improves lives and powers the world forward

Our Pascagoula refinery manufactures fuels and other products sold under the Chevron®, Texaco® and Caltex® brands. The refinery can process approximately 369,000 barrels per day of crude oil to produce gasoline, jet fuel and diesel fuel. Our other products include aviation gasoline, petroleum coke, sulfur and fuel oils such as Liquefied Petroleum Gas (LPG).

Since beginning operation in 1963, the refinery has grown to be the corporation's largest U.S. refinery and one of the top petroleum refineries in the United States. Chevron is one of the world's leading integrated energy companies. We believe affordable, reliable and ever-cleaner energy is essential to achieving a more prosperous and sustainable world.

For more information about Chevron's commitment to the environment and the surrounding community, visit pascagoula.chevron.com.

lower the carbon intensity of our operations

Chevron's strategy is straightforward - we are leveraging our strengths to deliver lower carbon energy to a growing world. Our capabilities, assets and customers are distinct advantages. We are building on these strengths as we aim to lead in lower carbon intensity oil, products and natural gas and to advance new products and solutions that reduce the carbon emissions of major industries.

Chevron's approach to refining carbon intensity

Refining carbon intensity (RCI) focuses on refining emissions, as the majority of Chevron's Downstream emissions are from our refining business. Scan to learn more.

grow lower carbon businesses

Achieving a lower carbon future at scale requires partnership and collaboration throughout the energy system. Transitioning to a lower carbon future provides opportunity for our company and those we support. Essential industries that have helped build modern society, like transportation, agriculture, and manufacturing, desire to find viable ways to vastly and rapidly lower the carbon intensity of their operations.

Our work to create fuels of the future—like hydrogen, renewable diesel, and sustainable aviation fuel—can lower the life cycle carbon intensity of these products and, in turn, support our customers' efforts to reduce their overall greenhouse gas emissions. Scan to learn more.

2024
report to our community

we work to deliver energy that improves lives

We work hard to operate safely and responsibly, to be a good corporate citizen, and to be a partner in the community's progress.

To our community,

Chevron values being a neighbor of choice. This means we care about maintaining great relationships with our neighboring cities in Jackson County and the great state of Mississippi. The support provided to this Refinery and our employees on a local and statewide level is not lost on us and is something our company cherishes. We strive to reciprocate that support.

As you can see throughout this report, the relationship we share with our neighbors and this state makes a real, tangible difference throughout our communities. Our employees are committed to elevating the area our Refinery calls home because it's our home too. Our time and resources are dedicated to improving quality of life each year through programs that support education, workforce development, environmental stewardship, health and well-being and more. I'm proud of my colleagues and proud of the embrace we receive from our home.

Throughout its existence, Chevron has remained committed to balancing economic prosperity, energy security and environmental stewardship. Pascagoula plays a key role in that commitment. The Pascagoula Refinery's purpose statement—Together, we own our future—captures the spirit and intent of our efforts. We are invested in this community for the long haul. We're taking actions associated with our traditional oil and gas operations to work toward a lower carbon future while exploring the opportunities on the horizon in new energies.

It's an exciting time to be in the business of supplying the world's energy needs and manufacturing the building blocks of products we all use every day. Chevron Pascagoula is grateful for the opportunity we've had to be a part of this wonderful Gulf Coast community for more than 60 years. We look forward to continuing our long-lasting relationship with the Gulf Coast and the state of Mississippi for 60 more years and beyond.

Sincerely, your neighbor,

Tim Potter

we work to make the world a better place

Our partnerships and investments in health, education, environment and economic development advance progress and strengthen communities.

people

Chevron partnered with Singing River Health Foundation to support the implementation of Hope Squad into all public middle and high schools in Jackson County. Hope Squad is a peer-to-peer curriculum-based suicide prevention program.

The Pascagoula Refinery continued to support organizations in our area that meet critical needs. Those needs range from preventing childhood obesity (Let's Go Gulf Coast), providing support in the wake of disasters (American Red Cross/Team Rubicon), to supporting the health and wellbeing of our community (United Way for Jackson, George & Greene Counties, American Heart Association), and much more.

prosperity

Chevron continued to support education in a variety of ways: early childhood education (Excel by 5), K-12 STEM initiatives (Project Lead the Way/Fab Lab Jackson County). In addition to scholarships for MGCCC students, the Pascagoula Refinery donated \$22,000 to support the purchase of equipment to support the Process Operations program at the Jackson County Campus.

Chevron worked alongside Main Street Pascagoula and the Pascagoula Redevelopment Authority to support the revitalization efforts in downtown Pascagoula by providing a portion of match funding for Main Street to obtain a \$500,000 grant for streetscape improvements.

environment

The Pascagoula Refinery partnered with non-profit organization Mississippi Gulf Fishing Banks (MGFB) to donate surplus equipment for use as artificial reefs offshore. Four carbon steel structures from a recent refinery project that were never used as manufacturing equipment have been repurposed as artificial fishing reefs. In addition to the steel structures, Chevron donated \$30,000 to MGFB to support the deployment of the reefs.

Chevron employees and their families cleaned up the shoreline around Point Park in Pascagoula as part of the Mississippi Coastal Cleanup organized by MSU Extension Service.

The Pascagoula Refinery supported Jackson County and the Mississippi Department of Environmental Quality at the Household Hazardous Waste Collection Day. This annual event allows Jackson County residents to bring in specialty waste such as aerosol cans, tires, surplus paint and motor oil for disposal free of charge.

we work to enable human progress

Our vision is to be the global energy company most admired for its people, partnership and performance.

community investments

We contribute to local communities by making strategic social investments in four core areas: health, education, economic development and environment.

Health & Social Well-being

- 5-2-1-0 Let's Go Gulf Coast Childhood Obesity Initiative
- United Way for Jackson, George & Greene Counties
- American Heart Association
- American Red Cross

Education

- Early Childhood Education, Excel By 5
- Science, Technology, Engineering, Art & Math programs
- Project Lead The Way
- FabLab Jackson County and mobile units

Economic and Workforce Development

- Mississippi Gulf Coast Community College
- MSU Engineering on the Coast
- Central Gulf Industrial Alliance
- Downtown Pascagoula Revitalization
- Mississippi Economic Council
- Local Chambers of Commerce
- Jackson County Economic Development Foundation

Environment

- Friends of the Grand Bay NERR
- Pascagoula River Audubon Center
- The Nature Conservancy
- Land Trust for the Mississippi Coastal Plain
